Dear Friends,

We are excited to announce that **Reuven Feuerstein's** *Beyond Smarter: Mediated Learning and the Brain's Capacity for Change* is now a **Best Seller**.

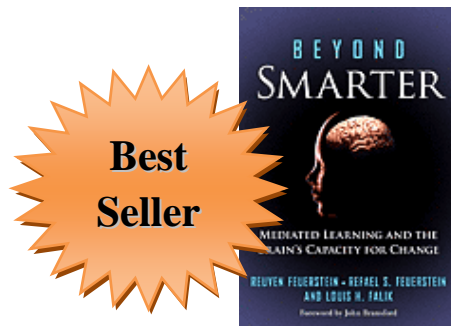

We here at **IRI** are celebrating this news with a special offer just for you. When you order the Beyond Smarter book or any of Reuven Feuerstein's other frequently bought books you'll receive **10% off** the sale price AND **free** shipping and handling (*some restrictions do apply).

Requires Promo Code: BST2011

Expires: April 25, 2011

To order please visit <http://iriinc.us/store.html> or call us toll free at **877.474.4900**

Beyond Smarter:

Mediating the Brains Capacity for Change

Originally developed to help students overcome learning obstacles created by emotional trauma or neurobiological learning disabilities, Reuven Feuerstein's work is now used in major cities around the world to support improved thinking and learning by all students. This book is the most up-to-date summary of his thinking and includes accessible descriptions of his tools and methods for cognitive modifiability and mediated learning. With dramatic case studies throughout the text, Feuerstein and his co-authors define intelligence as a dynamic force that drives the human organism to change the structure of thinking in order to answer the needs it encounters. They describe in detail the specific skills of the three stages of thinking:

- Input or observation and data-gathering stage,
- Development or processing stage, and
- Output stage, including analysis, synthesis, and communication.

They show how student thinking can stall in multiple ways at any of these stages and how intentional mediation can help students restructure their thinking and improve their ability to learn. Similar to cognitive mediated learning, the authors address mediation of the social and emotional skills that impact learning. This new book from an educational icon and his colleagues will inform the work of any educator seeking to improve student achievement in their school or district.

Developing All Students' Critical Thinking Skills for the 21st Century

The Feuerstein Method – Cognitive Pathways to Math – Cognitive Pathways to Reading – 21st Century Enriched Learning School

Early Childhood – Middle School – High School – Special Needs

Frequently Bought Together

Dynamic Assessment of Cognitive Modifiability

Revised and extended edition of the 1979 volume addresses the necessity of directing the process of dynamic assessment and mediation to a wide range of learners by focusing on the enhancement of cognitive functions and the need for the individuals to modify themselves in order to adapt to changing conditions of existence.

- Conceptual and theoretical basis for dynamic assessment.
- Clinical application with detailed description of the procedure and instruments of the Learning Potential Assessment Device (LPAD)
- Deep analysis of the research and construction of the LPAD instruments
- Creating the outcomes of dynamic assessment

The Feuerstein Instrumental Enrichment Program

The exposure of Instrumental Enrichment along with Mediated Learning Experience has assisted in the cognitive rehabilitation/enhancement in the severely brain injured, learning disabled, down syndrome, autistic spectrum, blind, gifted underachievers, impoverished student, early childhood, and work force preparation in order to seek and correct deficiencies in fundamental thinking skills. This book provides deep analysis into the FIE programs and provides understanding for development of concepts, strategies, operations and techniques necessary to function as independent learners, increase their motivation, as well as developing meta-cognition.

You Love Me!! ...Don't Accept Me As I Am

This revised and expanded edition of Reuven Feuerstein classic book is based on the Theory of Structural Cognitive Modifiability (SCM) and Mediated Learning Experience (MLE) related to their "potential" for developmentally disabled individuals.

Specific focus is placed on children with special need because behavioral scientists have generally considered the factors, obvious in cases such as Down Syndrome, Trisomy 21, Fragile X, Williams Syndrome, DeSoto Syndrome, Autism Spectrum Disorder and other organic conditions, to be the ultimate barrier to any attempts to change the cognitive structure of individuals. The foundation of this book is not limited to addressing those with special needs as the theory of Structural Cognitive Modifiability (SCM) views all humans and their characteristics, including cognition - affective and emotional, personality and behavior as modifiable regardless of etiology, age, or severity of the condition.

Feuerstein's Theory & Applied Systems

This reader is the major theoretical, applied and practical collection of papers presented on Reuven Feuerstein's Structural Cognitive Modifiability, Mediated Learning Experience (MLE), Learning Propensity Assessment Device (LPAD), and Instrumental Enrichment (IE) which provide a comprehensive and authoritative coverage of the main topic in his methodology. This book is a basis for an in-depth discussion of some of the major elements of Feuerstein's theory presented from different angles - historical, theoretical, and applied.
